Committed Software Developer focused on delivering efficient and cost-effective solutions. Comfortable in both team and self-managed settings.

EXPERIENCE

MAR 2018 – JAN 2019

WEB DEVELOPER, STATE COURT OF AUDIT OF PARÁ

Belém, Brazil

Worked with Yii2 and Grails 3 frameworks developing, testing and debugging code. Other technologies included Git, Oracle SQL Developer, Oracle Data Modeler, JavaScript, HTML, CSS, PHP, Docker, and osTicket. Successfully developed and deployed an incident management process to better handle problems and requests in the IT department. The process was capable of improving customer satisfaction by 30% and reducing SLA's by 60%.

MAR 2017 – SET 2017

STUDENT IN RESEARCH PROJECT, FEDERAL UNIVERSITY OF PARÁ

Belém, Brazil

Worked on a team which researched, designed and developed open-source cross platform solutions directed at people with restrictions of movement, speech or writing. Helped conduct user-focused testing to evaluate the usability of applications adapted to certain forms of disabilities. Technologies used included Apache Cordova, JavaScript, HTML, CSS, and Unity.

MAR 2016 – DEC 2016

STUDENT IN RESEARCH PROJECT, FEDERAL UNIVERSITY OF PARÁ

Belém, Brazil

Collected large amounts of data and created graph visualizations to represent a network revolving around the subject of national museums. Based on Graph Theory and Search Engine Optimization techniques, the project aimed to optimize the network's visibility and promote its cultural content. Technologies used included Python and Gephi.

EDUCATION

AUG 2013 – JUN 2019

BACHELOR IN COMPUTER SCIENCE, FEDERAL UNIVERSITY OF PARÁ

Belém, Brazil
